

SURFACE SOLUTIONS  
FOR GRASS & GRAVEL

# TechTurf

## TechTurf

TechTurf consists of a specially prepared rootzone into which is blended thousands of small interlocking mesh elements. Selected turf is supplied to establish grass cover.

As the grass roots develop they penetrate through the mesh to form a deep anchored root system and a very stable rootzone.

The result is a free draining natural grass surface with no visible structures but with high load bearing capabilities.

TechTurf is supported by over a decade of high level civil engineering and turf grass research.\*

SURFACE SOLUTIONS  
FOR GRASS & GRAVEL

# TechTurf

TechTurf | ADpave | TurfGuard | GrassRoute

## benefits

- **Safe, attractive, natural grass surface**
- **High load bearing capabilities**
- **Resists rutting and compaction**
- **Rapid surface drainage**
- **Provides ideal source control for Sustainable Urban Drainage Systems (SUDS)**

## suitability

- Multi-use events areas
- Emergency vehicle access roads (inc. HGV)
- Overspill car parks and helipads/airfields
- Sports surfaces
- Amenity areas and slopes up to 50°
- Source control for SUDS

## installation

Each application of TechTurf is different. Full technical specifications and installation advice are available from ADP Limited

Please contact the ADP Limited at the address below for further information on this and associated products.
